### DETAILED ACTION

1. This office action is responsive to the amendment filed on 10/23/2006.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunz.  
(US Patent 6,127,989).

Kunz discloses, in figure 2, a RFID system comprising an antenna 6 having a plurality of conductive loops to produce an electromagnetic field for communication with a RFID tag, a substantially contiguous conductive shield 20 positioned around the antenna and within a plane parallel to the antenna, wherein the conductive shield comprises planar conductive regions oriented to form a non-shielded inner region and the antenna is disposed within the non-shielded inner region.

#### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2821

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claim 26 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 25 of copending Application No. 10/784,109. Although the conflicting claims are not identical, they are not patentably distinct from each other because they commonly comprise the method having the steps of determining a dimension M of a RFID tag, selecting a distance D based on the dimension M, and positioning a plurality of an antenna the selected distance D apart for communication with the RFID tag within the RFID system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented

6. Claims 22-25 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of copending Application No. 10/784,109. Although the conflicting claims are not identical, they are not patentably distinct from each other because they commonly comprise a RFID system having an antenna and a substantially contiguous conductive shield 20 positioned around the antenna, ...

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Allowable Subject Matter***

7. Claims 1, 4-15, and 18-21 are allowed.
8. Claims 28-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
